# Get in Touch with the Finer Points of Ultrasonic Scaling

## Cavitron THINsert™ is designed to ...

### ... allow access to areas difficult to reach

47 % thinner than even the FSI® Slimline Insert (green). This allows access to:

- Interproximal areas
- Areas where tissue is tight
- Tooth misalignments

### ... allow improved adaptation

Cavitron THINsert provides an improved 9° back bend angle and longer shank to further increase adaptation to hard to reach areas.

### ... supports a variety of clinical situations

Cavitron THINsert is designed to be used at all power levels and thereby offers the clinician confidence in product reliability in a variety of clinical situations.

## What Hygienists are saying about the Cavitron THINsert™ Ultrasonic Insert \*

**86%** of users rated the Cavitron THINsert ultrasonic insert adaptation as easy or very easy.

**87%** said they would replace some hand scaling with ultrasonics due to the access provided by the Cavitron THINsert ultrasonic insert.

**90%** of users rated the cleaning efficiency of the Cavitron THINsert ultrasonic insert as better than their current debridement methods.

**100%** of users said they would purchase or recommend the purchase of the new Cavitron THINsert ultrasonic insert. That's the power of THIN.

\* U.S. user trial, data on file
