General Cleaning and Sterilization Procedure for Autoclavable Film and Sensor Holders

Refer to individual product’s Directions for Use which can be found at www.dentsply.com.

1. Disassemble instrument(s).
2. Remove debris from components with hot water and soap.
3. Put components in sterilization pouches, and place in the middle tray of the autoclave, away from autoclave walls and heating element. Plastic parts must be in a separate pouch from metal arms, to avoid melting or warping.
   - DO NOT use phenol-based glutaraldehyde.
   - DO NOT use special application or ultrasonic cleaners.
   - DO NOT CHEMICLAVE or DRY-HEAT STERILIZE.
   - DO NOT cold sterilize.

Note: Plastic parts have a limited life and should be replaced periodically. Any method of sterilization will shorten the life of plastic parts.

IMPORTANT: DO NOT AUTOCLAVE PLASTIC COMPONENTS ON BOTTOM SHELF.
**It fits! Any Size — Any Brand**
The self-adjusting clip *stretches* to fit size 0-2

DXTTR® Dental X-Ray Trainers
For over 30 years, DXTTR manikins have been an excellent tool for teaching proper radiographic imaging to dental students, hygiene students, dental assistants, and clinical staff. Today there are 6 versions: DXTTR III Plastic or Natural, HF Adult DXTTR Polymeric Resin or Natural, DXTTR Jr. Polymeric Resin, and Pan DXTTR (natural).
- Excellent tools for illustrating proper radiographic positioning.
- DXTTR X-ray training tools allow for unlimited, consistent imaging without patient radiation exposure.
- High repeatability makes possible a series of radiographs with varied exposure factors to demonstrate how they influence results.
- Intraoral DXTTRs come with two sets of chair hooks (large and small), head strap, and passport. Table Top Stand is available separately.

DXTTR® Refurbishment Camp
Each summer your DXTTR can enjoy a few weeks off at Camp Rinn. During his stay at camp, your DXTTR will receive new skin, new paint, new foam flesh, a new tongue and a new head strap, plus an overall checkup.

DXTTR® III
Available in Natural and Plastic
- DXTTR III uses a lever-and-ratchet mechanism for opening and closing his mouth (requires one hand to close mouth).

NOTE: Plastic DXTTR III does not easily fit a Size 2 Digital Sensor.
546001 DXTTR III – Plastic
546002 DXTTR III – Natural

DXTTR® Trainers may only be purchased directly from DENTSPLY Rinn. To place an order, please contact us at 800-323-0970. All manikins are made-to-order; allow 12-14 weeks for delivery. Limited quantities may apply to orders for Natural DXTTR manikins.
HF Adult DXTTR®
Available in Natural and Polymeric Resin
- Both feature a foot pedal to open and close his mouth for two-handed training.
- More realistic skin and tongue than DXTTR III.
- Polymeric Resin model has a larger palate to accommodate Size 2 digital sensors.

546003 HF DXTTR – Polymeric Resin
546004 HF DXTTR – Natural

DXTTR® Jr.
Hands-Free Polymeric Resin
- Life-like mixed dentition resembles a 7-9 year-old child complete with tooth buds and partially erupted adult teeth.
- Foot pedal opens and closes mouth for two-handed training.
- Fits a Size 0 and Size 1 sensor.

546006 DXTTR Jr.

How to Minimize Patient Radiation Exposure

Now more than ever, patients are increasingly expressing their concerns regarding dental x-rays and their exposure to radiation. Whether it’s Dr. Oz urging viewers to avoid x-rays taken without thyroid protection, or the latest radiation news, patients are worried. As a dental professional, you understand the importance of radiographic images for a complete diagnosis as well as a preventive measure for overall good health.

Did you know:

Using a thyroid collar on your aprons can reduce exposure levels by 26-33%.\(^1,2\) (page 19)

Using a Rinn Collimator can cut radiation dosage by up to 40%!\(^1\) (page 9)

Using XCP® (Extension Cone Paralleling) devices ensures consistently accurate and reproducible x-rays, thereby reducing the need for retakes.* (page 9)

Switching from D-speed film to a fast F-speed film or using a digital sensor can reduce patient exposure levels by 50%.*

2 NCRP Report 145, 2003
* Data on file.

Pan DXTTR includes a sturdy base with wheels for easier transport and storage.

Now your DXTTR can travel the world in style.
The co-polymer polypropylene storage and travel case includes custom foam compartments designed to fit your DXTTR and his accessories.

25% LIGHTER THAN LEAD-LINED APRONS*

According to the ADA:
“All protective shields should be evaluated for damage (i.e. tears, folds, and cracks) monthly using visual and manual inspection.”*

Note: A crack in the outer layer could expose the lead inside, which could transfer to the patient. We recommend replacing your aprons every 3-5 years.

**APRON GUIDE**

The NCRP (National Council on Radiation Protection and Measurements) requires thyroid shielding for all children and highly recommends it for all adults as well.¹
