Natural. Efficient. Consistent. Ceramco® PFZ.

DENTSPLY International, Inc. is a multinational health care corporation with operations around the globe and a rich history of product excellence. For over a century, DENTSPLY International has been committed to providing the dental community with innovative, high-quality, cost-effective dental products, services and equipment. From humble beginnings in 1899, the company has grown to become the largest professional dental products manufacturer in the world.

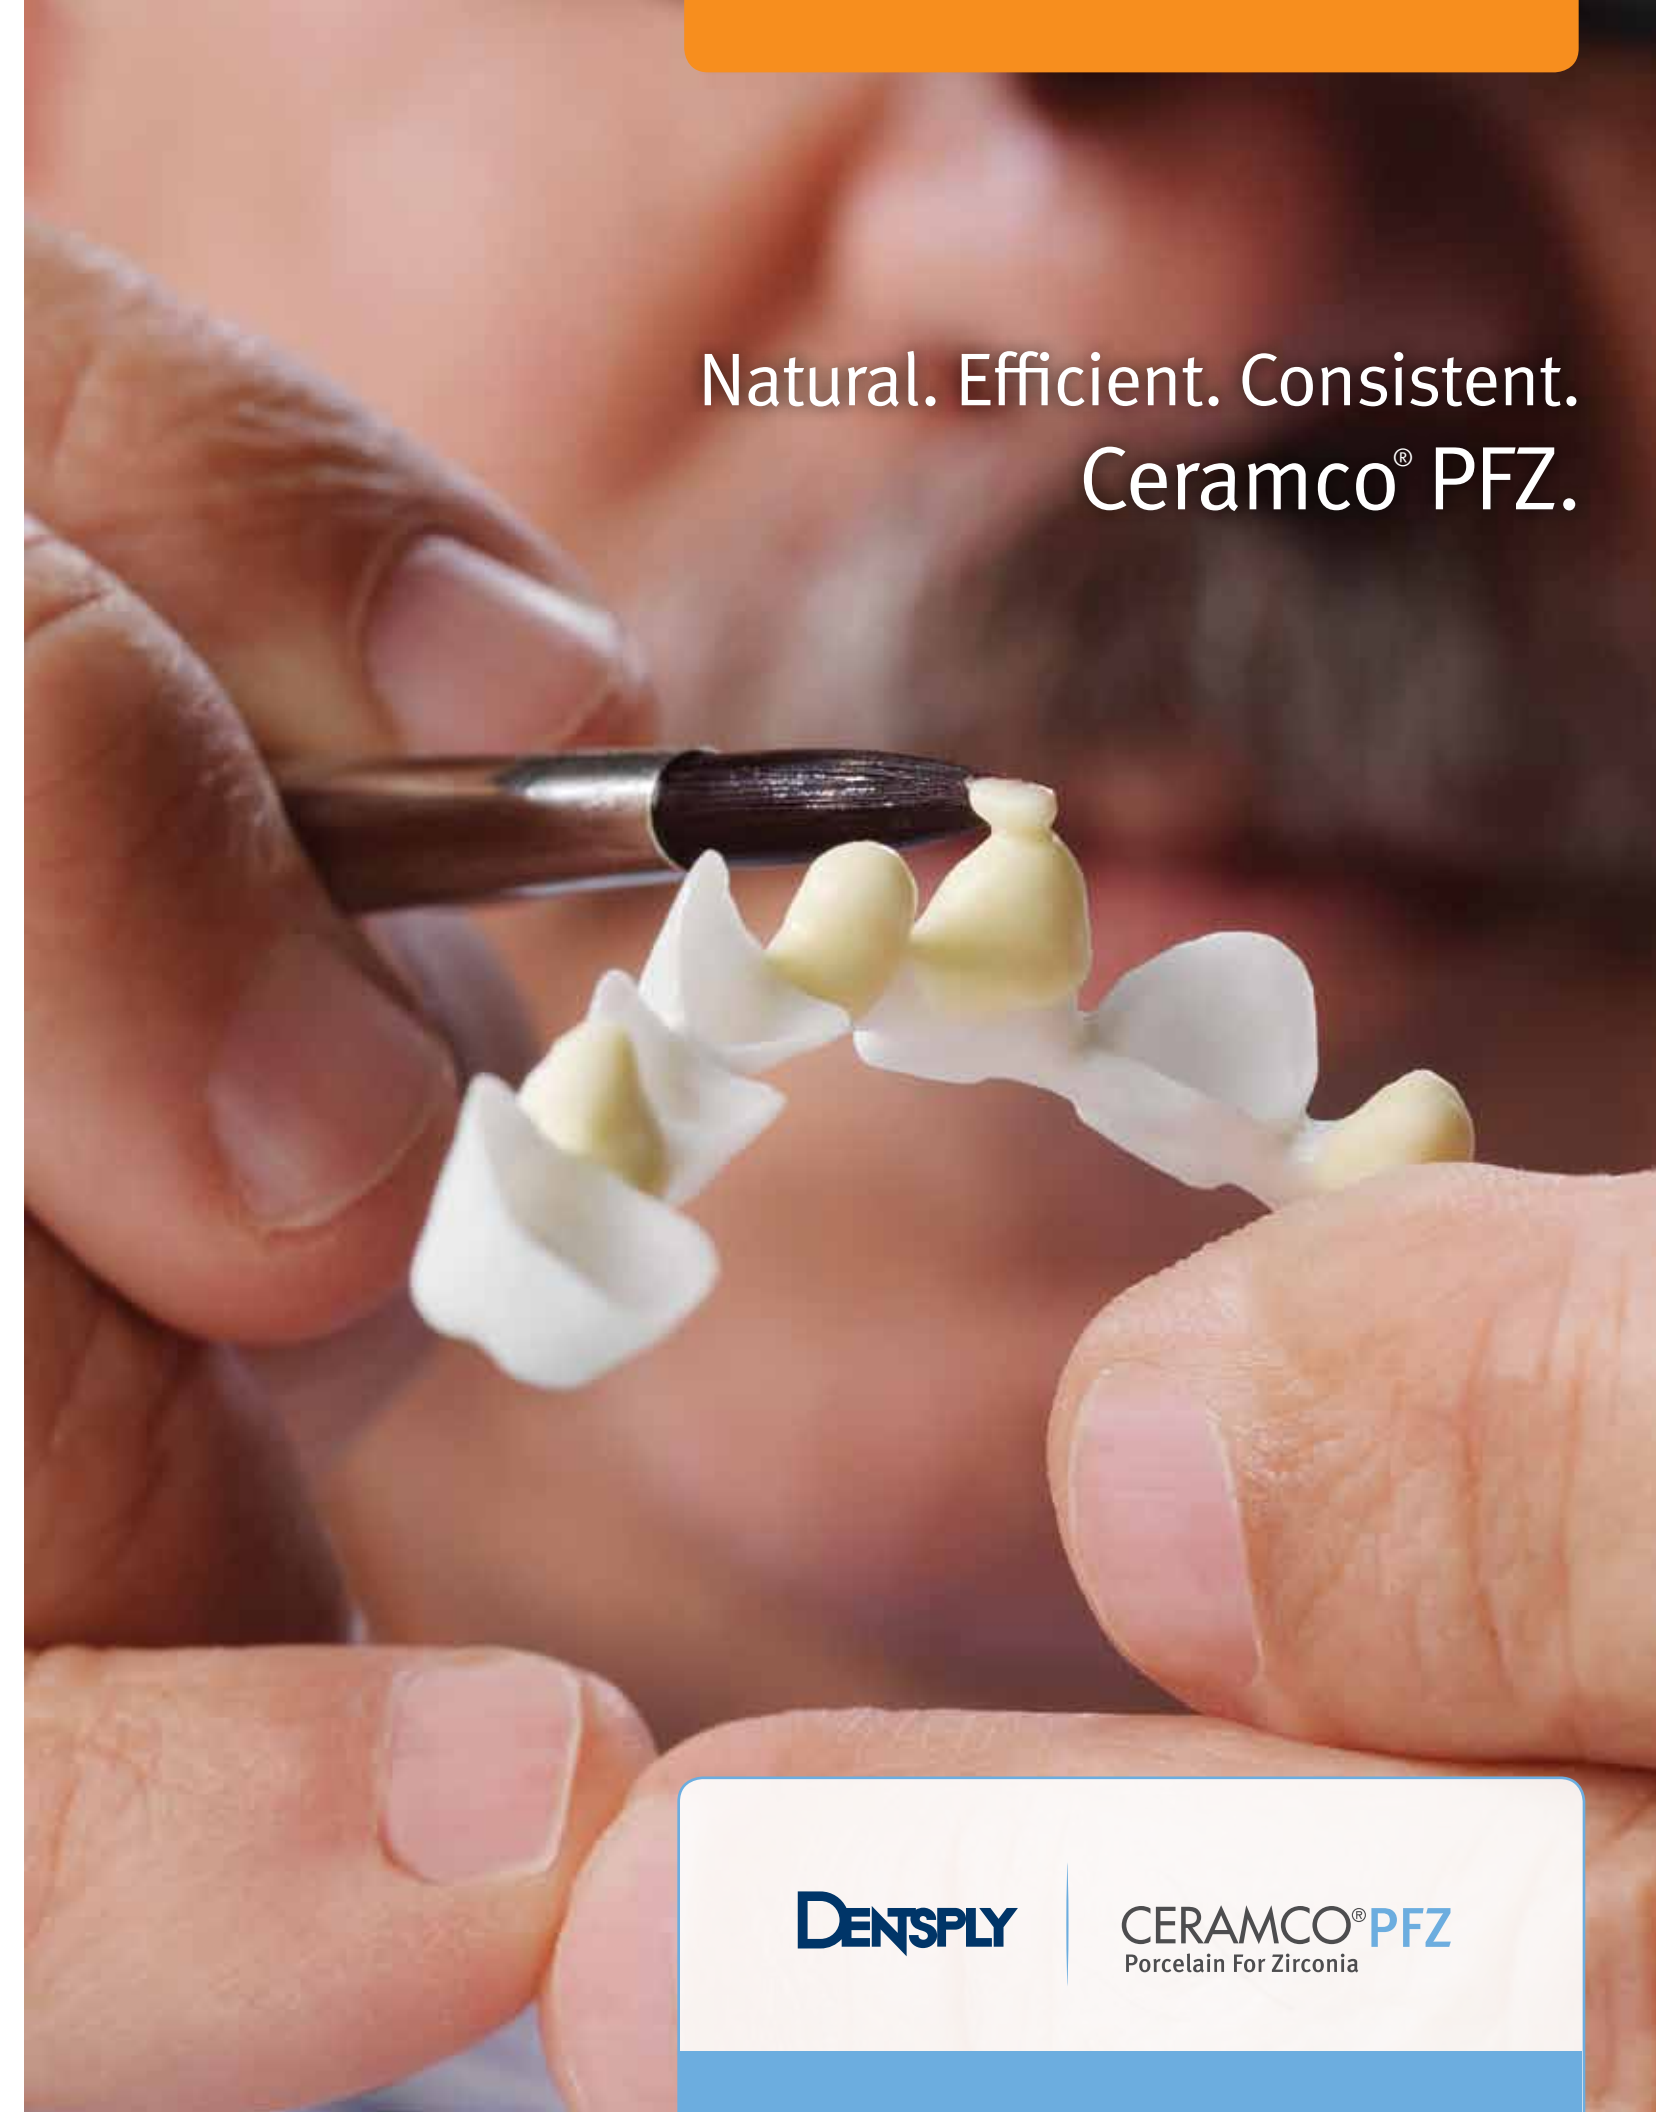

DENTSPLY Ceramco® is one of the world's premier brands for crown and bridge restorative products and materials. Ceramco porcelains are renowned for their reliable quality and ease of use, characteristics that drive efficient processes for dental laboratories and ensure consistency in the outcomes of their fixed prosthetic restorations.

The result is productivity and profitability, which DENTSPLY helps dental laboratories achieve through its commitment to enabling them to Lab SmarterSM.

CERAMCO® PFZ
Porcelain For Zirconia

Achieve natural results. Efficiently and consistently.

Ceramco® PFZ porcelain is formulated to provide laboratories an optimal balance of craftsmanship and efficiency while meeting the needs of demanding production schedules. Now with an expanded shade selection, Ceramco PFZ is the compelling choice in the growing zirconia category.

Advanced Formula for Natural Esthetics

Ceramco PFZ all-ceramic porcelain naturally enhances the technician’s craftsmanship due to its complex chemical properties of opalescence, fluorescence and translucency for light reflection, refraction and transmission like natural teeth.

Available in 46 shades – including 26 PZ shades keyed to the Vita® 3D-Master®, 16 Vita® A-D shades and 4 illuminé™ bleached shades – Ceramco PFZ shade-out-of-the-bottle is the practical choice to fill most crown and bridge prescriptions.

Technique Options for Production Efficiencies

Ceramco PFZ combines easy layering or pressing techniques into one all-ceramic, ideal for Cercon® Zirconia or any Y-TZP 100% zirconia framework. Its ease of use is consistent with traditional Ceramco porcelains, enabling laboratories to gain efficiencies when integrating it into their existing operations.

Consistent Results for Outcome Certainty

PFZ shade-out-of-the-bottle enables creation of restorations with repeatable esthetics. The leucite-free formula, with exceptional thermal stability over multiple firings, gives PFZ its translucent characteristics. When the recommended build-up or pressing techniques and firing schedule are followed, PFZ delivers restorations with inherently better wear characteristics. A new 6-minute cooling cycle reduces incidents of chipping to levels comparable to or better than very low PFM rates.² Consistent results and peace of mind are sure to please dentists and their patients.

Simply the Lab SmarterSM Choice

Ceramco PFZ is the laboratory porcelain that allows labs to offer premium, all-ceramic restorations affordably. By delivering dependable shades, easy handling and process efficiencies, it’s a natural example of how DENTSPLY Ceramco provides options to Lab Smarter.

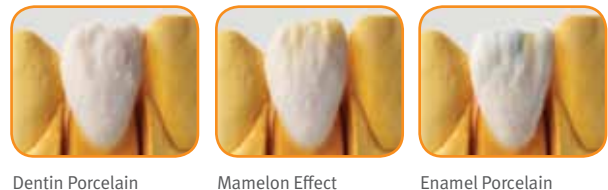

Layering or pressing: two easy production techniques for consistent results.

Shade Availability

Whether layering or pressing, Ceramco® PFZ offers a full spectrum of out-of-the-bottle shades. Select from 16 A-D shades¹, 4 bleach shades and 26 PZ Shade Series shades.

LAYERING TECHNIQUE

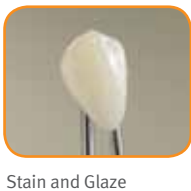

Characteristic of Ceramco porcelains, PFZ handles easily and enables technicians to replicate natural dentition or to custom-craft to meet the patient’s cosmetic needs.

Final: Completed Advanced Build-Up

PRESSING TECHNIQUE

For technicians who prefer waxing to building, Ceramco PFZ offers 2g pressing ingots. Pressing provides extremely consistent shades and the option of easy all-ceramic margins for increased esthetics and accuracy. Pressed margins allow for etching and bonding of the margin area, if desired, for improved mechanical retention and the assurance of enduring adhesion between the coping and the porcelain.

Final: Shade Verification

Ceramco® PFZ porcelain compatibility chart.

	Layering Technique	Pressing Technique
Margin Porcelains (must use before liner)	Yes	Yes
