Greater Versatility is the Key to Success

Success® Injection System

The Success Injection System combines the precision of high-pressure injection with the top performance of Lucitone® denture base materials. The result is a wide variety of dental appliances delivered with more consistency and greater accuracy than the standard compression molding technique.

The high-pressure injection drives resin into a closed flask to deliver precise adaptation of the model. Injecting denture resin under continuous pressure fills all voids completely and compactly, eliminating the need for trial packing. The closed-flask injection significantly reduces the chance for change in vertical dimension of occlusion. This kind of precision means five, any, occlusal processing errors for a great fit.

From full dentures to flexible partials, Lucitone Denture Base Resins in combination with the Success Injection System offer superior performance and increased versatility. Lucitone is the name to trust for high performance and aesthetics every time.

The Industry’s Leading High-Impact Denture Base

Lucitone 199® Denture Base Resin

With over 40 years of clinical success, Lucitone 199 is the industry’s leading denture base resin family that is top of mind for both laboratories and dentists alike. Dentists know and trust Lucitone 199 in their dentures, and have for years. Lucitone 199 is the premium choice for both tissue and implant-supported full and partial dentures, offering outstanding esthetics, high impact resistance, and superior flexural strength.

- Industry standard for premium high-impact denture base resins. Trusted and reliable.
- Superior high-impact resistance and flexural strength. Resists breakage.
- Balanced translucency and excellent vein simulation. Delivers esthetic results.
- Compression packed, injected or microwavable if injected. Adapts to laboratory processes.
- Available in original, light pink, light reddish pink and dark pink shades. Covers patients’ needs.

Premier Esthetics and Customized Flexibility

Lucitone® FRS® Flexible Dental Resin

Designed for use with the Success® Injection System, Lucitone FRS Flexible Denture Resin is a temporary thermoplastic injectable resin that offers customizable flexibility, high impact resistance and transparency, delivering esthetic removable partial dentures and clear or colored clasps.

- Semi-crystalline nylon composition for improved color stability and stain resistance. Provides esthetics.
- Easy to finish and polish due to the microcrystalline structure. Saves time.
- Monomer- and metal-free. Non-irritating.
- Available in original, light pink, light reddish pink and dark pink shades. Esthetic shade options.
- Clear shade for fabrication of clear clasps, occlusal splints, and night guards. Offers greater versatility.

A Lucitone® Denture Resin for Every Need

Lucitone Clear

Lucitone Clear is a quality resin with excellent physical strength properties that can be compression packed or injected.

- Fracture strength
- Transparency

Lucitone 199® Repair Material

Lucitone 199 Repair Material provides excellent bond strength and a high polish finish.

- Excellent handling characteristics – flows very freely.
- Available in all 6 Lucitone 199 shades.

Luci-Sof® Soft Denture Liner

Luci-Sof® Soft Denture Liner is a long-term denture liner that creates an excellent bond to the denture base and stays soft and flexible.

- Long lasting soft reline
- Stain resistant
- Available in premixed sheets or injectable cartridges
