Increasing access to endodontic care
Every tooth matters

Retaining teeth increases health¹ and quality of life²³. However, in many communities access to endodontic care is still limited due to the cost of the procedure and limited care.

Project 32, by Dentsply Sirona Endodontics, seeks to close these gaps in order to save more teeth by:

1. Providing special priced consumables
2. Empowering endodontic care through clinical education and ongoing support

Bringing endodontic care to more people who need it

A bespoke instrument solution adapted to your needs
• Special priced solution
• Reduces your treatment time⁴

World-class, hands-on clinical education
Project 32 empowers endodontic care by providing comprehensive hands-on courses to train local dentists on our instrument solution.
