Root to Crown Masterclass

Mastery of the basics for improved outcomes

Enjoyable, Predictable Outcomes
Each step of endodontically treating and restoring a tooth is connected. This Root to Crown Masterclass walks through each step of the procedure – with each building on the success of the previous phase. From diagnostic protocol through coronal restoration, learn techniques for clinical success at every step needed to take the patient out of pain, restore function to the tooth while maintaining the proper aesthetic, and enhance long term success.
The aim of these modules will be to provide useful and practical tips to enhance your confidence and the small group environment will allow personalised interaction and hands on experience.

Professor Ove Peters
Dr Ove A Peters joined The University of Queensland School of Dentistry in 2020 after faculty positions in Heidelberg, Germany and Zurich, Switzerland, as well as at the University of California and the University of the Pacific, both in San Francisco, CA, USA. He received his postgraduate education in endodontics at the University of Zurich and UCSF and is certified as a Diplomate of the American Board of Endodontics. He was the founding director of the postgraduate endodontic program at the Arthur A Dugoni School of Dentistry in San Francisco, a professor with tenure and the Chair of the Department of Endodontics at that school. Dr Peters has wide-ranging research expertise and has published more than 150 manuscripts in peer-reviewed journals, related to endodontic technology and biology. He has authored two books, has contributed to several leading textbooks and is an associate editor for the International Endodontic Journal, an academic editor for PLOS One and serves on the review panel of multiple other journals. Dr Peters has received, among other awards, the Hans Genet Award of the European Society of Endodontology and more recently the Louis I. Grossman Award of the American Association of Endodontists. He is a member of OKU as well as a Fellow of the International and American Colleges of Dentistry.

Venue:
Dentsply Sirona Centre for Dentistry
1/50 Borthwick Avenue
Murarrie QLD 4172

Module 1: Diagnosis - tips to assist diagnosis, including use of diagnostic aids

Date: 26 March 2021
Time: 12:30pm - 5:00pm
Price: $300

Register Now

Module 2: Chemo-mechanical preparation of root canal teeth including glide path management

Date: 28 May 2021
Time: 9:00am - 5:00pm
Price: $600

Register Now

Module 3: Obturation of the root canal system

Date: 30 July 2021
Time: 12:30pm - 5:00pm
Price: $300

Register Now

Module 4: Restoring the tooth to function

Date: 10 September 2021
Time: 12:30pm - 5:00pm
Price: $300

Register Now

Prices as indicated or book all 4 for $1,100
– a saving of $400 and includes a take home training kit valued at $400.

Venue: Dentsply Sirona Centre for Dentistry 1/50 Borthwick Avenue Murarrie QLD 4172

Module 1

3.5 CPD Points

Diagnosis - tips to assist diagnosis, including use of diagnostic aids

- Access and Canal Location
- Access including anatomy
- Canal location– including difficult to locate orifices (MB2, second distal or lingual canal) and negotiation
- Use of adjunctive ultrasonic access tools such as StartX
- Working length determination and how to optimise accuracy of the electronic apex locater
- Radiography - practical tips for conventional intraoral radiography and introduction to CBCT
- Aiming devices - including RINN XCP phosphor plate and sensor holders
- Positioning techniques with anterior, posterior and bitewings
- Case Selection
- Choosing the cases to win - maximising favourable outcomes.

Dentsply Sirona will be providing hand files and will discuss mechanical instruments to access canals.
Requirements: Attendees please bring 3 cavity access prepped molars or pre-molars. Please bring radiographs of each tooth. Otherwise plastic blocks will be provided.

Date: Friday 26 March 2021
Time: 12:30pm - 5:00pm
Price: $300

Register Now

Module 2

6 CPD Points

Chemo-mechanical preparation of root canal teeth including glide path management

Glide path management using Proglider, Trunatomy Glider and Wave One Glider, glide path files followed by root canal shaping with nickel titanium techniques including Protaper Next, Trunatomy, and Wave One Gold file systems.

All files, motors etc will be provided for your use.

Requirements: Participants please bring extracted teeth from previous workshop, or if attending this workshop only, please bring 3 cavity access prepped molars or pre-molars. Please bring radiographs of each tooth. Otherwise plastic blocks will be provided.

Date: Friday 28 May 2021
Time: 9:00am - 5:00pm
Price: $600

Register Now

Module 3

3.5 CPD Points

Obturation of the root canal system

Following obturation, what happens next? Restoration of the endodontically treated tooth

- Why, when and how?
- Lateral compaction, matched cone technique, warm techniques (including carrier based e.g. GuttaCore, warm vertical compaction), hybrid techniques, MTA
- Restoration of the endodontically treated tooth: considerations
- Prognosis will be discussed

We will provide all you need to obturate teeth that have already been prepared.

Requirements: Participants to bring extracted teeth from previous workshop, or if attending this workshop only, bring 3 cavity access and canal prepped molars or pre-molars. Please bring radiographs of each tooth. Otherwise plastic blocks will be provided.

Date: Friday 30 July 2021
Time: 12:30pm - 5:00pm
Price: $300

Register Now

Module 4

3.5 CPD Points

Restoring the tooth to function

A good Endodontic procedure requires a good coronal seal for effective long term clinical outcomes. This module will focus on key clinical procedures to enhance clinical outcomes of the endodontic treated tooth.

- Review efficient strategies to improve clinical outcomes and create a tight coronal seal.
- Effective bonding and composite restorations and dentine replacement.
- Review monomers in bonding protocols affects in overly dry and moist environments.
- Assess CADCAM milling and cementation of glass ceramics.
- Crown placement protocol and the right cements for the right application.

Date: Friday 10 September 2021
Time: 12:30pm - 5:00pm
Price: $300

Register Now

Prices as indicated or book all 4 for $1,100 – a saving of $400 and includes a take home training kit valued at $400.
