Implants

Azento™ – streamline your implant workflow

Your time is valuable

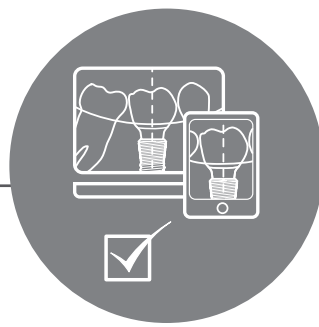

Azento reduces your practice workflow process to scanning, confirming the treatment plan and performing the implant procedure – saving you valuable time.

- Process can be customized to accommodate practice preferences for outside lab and/or chairside milling.
- **Eliminates the need for costly implant, instrument, and materials inventory.**
- Saves time and money by reducing the practice workflow steps for implant procedures.

Scan

Simply scan your patient and upload the data into the portal.

Approve

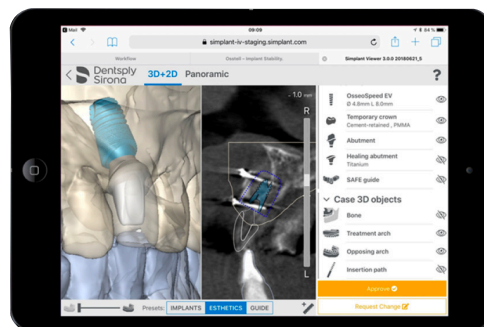

Within one business day you will receive a suggested implant and restorative treatment plan.

Treat

After approval of the treatment plan, we will design, manufacture, pack and ship the required surgical and restorative components in one single box, **within five business days.**

Easy ordering and planning

through an intuitive web portal.

” Working with Azeno is efficient, predictable and clinically precise. I enjoy the support with treatment planning, the convenience of receiving my “surgery in a box” and the entirely digital workflow. My assistants have embraced the concept and patients are impressed with the process and clinical presentation.

- Sarah Jockin, DDS

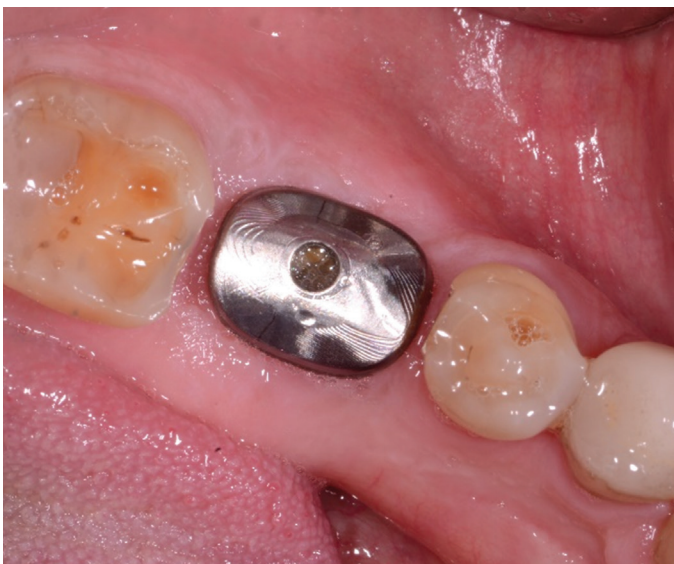

Engineered for better clinical outcomes

By redefining the approach to equipment and workflow, Azeno can make a significant difference to how you plan and carry out implant procedures.

- Azeno is designed to help clinicians provide the optimal implant size, position, healing environment, and restoration.
- CBCT and intraoral scan drive the customized treatment plan.
- Together with the application of a precise implant, guided surgery and high-precision instruments, the risk of complications can be reduced.

Customized healing abutments

The Atlantis® healing abutment is designed with the same emergence profile as the final Atlantis abutment

1a. Customized healing abutment contours the emergence profile

1b. Enabling an esthetic final result

” Azeno’s streamlined workflow offers tangible financial and time saving benefits by reducing the administrative burden, number of appointments and patient chair time. Most importantly, Azeno reduces stress for both patient and clinician.

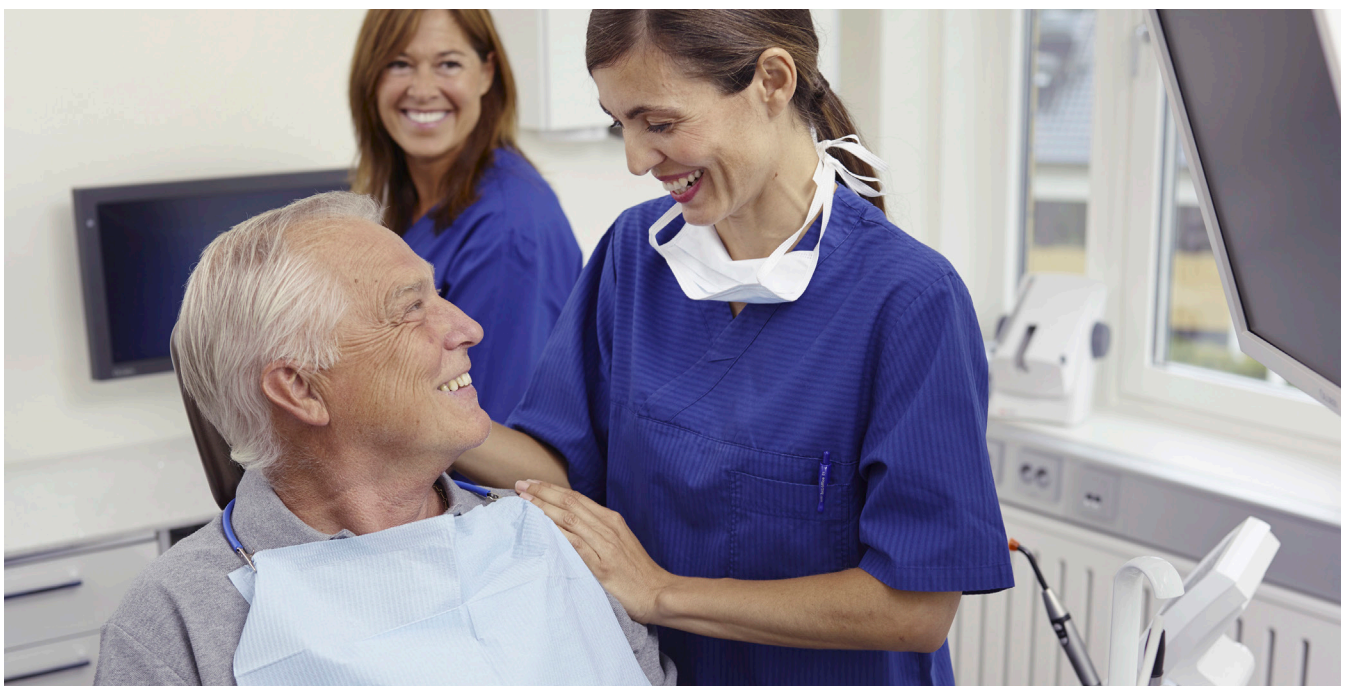

- Daniel Butterman, DDS

A fast track to increased patient acceptance

Azeno gives you an outstanding opportunity to increase patient acceptance rates, as well as creating a shorter, less stressful treatment period that enables a more pleasant patient experience.

- Allows fewer patient visits since surgical and temporary restoration are often possible the same day.
- Helps patients understand the treatment and create a sense of confidence in the procedure.

The Azento box contains everything necessary to complete a single-tooth implant treatment, allowing for a less-stressful patient experience.

Each patient receives a precise, custom treatment plan recommendation based on their CBCT and intraoral scanning images. Azento includes:

- Surgical guide and all necessary components and drills.
- Case-specific implant and Atlantis® custom healing abutment.
- Atlantis temporary restoration (optional).
