# Azento™ – streamline your implant workflow

## A solution that benefits your practice

Azento provides a time-efficient custom implant solution, tailor-made for specialists looking to make their case management and communication with referring dentists easy and effective.

- Process can be customized to accommodate practice preferences for outside lab and/or chairside milling.
- **Eliminates the need for costly implant, instrument, and materials inventory.**
- Enables easier data sharing, simplifying communication between specialist and referral dentist.

### Scan

Simply scan your patient and upload the data into the portal.

### Approve

Within one business day you will receive a suggested implant and restorative treatment plan.

### Treat

After approval of the treatment plan, we will design, manufacture, pack and ship the required surgical and restorative components in one single box, **within five business days.**

Easy ordering and planning

through an intuitive web portal.

” As a surgeon, I want to preserve the patient’s bone and soft tissue contours by placing an immediate implant and provisional restoration. But, I hate having to make and adjust a provisional in surgery. Azeno gives me exactly what I need by allowing me to precisely place the implant based on the final prosthetic plan and deliver the perfect provisional or custom healing abutment without squandering valuable surgical time.

– Dr. Jay B. Reznick, DMD, MD

## Engineered for better clinical outcomes

By redefining the approach to equipment and workflow, Azeno leverages the use of specialists’ existing digital technology to enable easier, more predictable restorative work for the referral dentist.

- Provides a solution to easily share digital data and create a team care delivery approach with referring dentists.
- CBCT and intraoral scan drive the customized treatment plan.
- Restoratively driven custom digital treatment plans ensure the implant is in the right position for successful restoration.
- Custom healing abutments supports restorative work – creating a favorable environment for the final restoration.

### Customized healing abutments

Post-operative radiograph showing implant placement exactly as planned and the custom Atlantis Healing Abutment completely seated.

Clinical appearance at the four month post-operative visit, demonstrating good tissue health and support of the interproximal attached gingiva.

” When you refer for implant placement, you give up control. You hope the surgeon follows the guide and it works out for the best. With Azento, planning can be shared, application is predictably simple and the result is a certainty.

- Dr. Mark Montana, DDS

## Grow your business with Azento

Azento can help implant specialists grow by providing a higher level of service, support and quality for referring dentists and their patients.

- Process can be customized to accommodate specialist and referring dentist restoration preferences, including chairside milling options.
- Azento enables referring dentists to reduce the number of patient visits and chair time required for temporary and final restorations.

The Azeno box contains everything required to carry out a successful implant procedure – while also creating a team care delivery approach with referring dentists.

Each patient receives a precise, custom treatment plan recommendation based on their CBCT and intraoral scanning images. Azeno includes:

- Surgical guide and all necessary instruments and drills.
- Case-specific implant and a custom Atlantis Healing Abutment.
- Atlantis temporary restoration (optional).
