

# SureSmile® provides an excellent treatment experience along the clear aligner journey to deliver the results doctors and patients expect

**An analysis of SureSmile® Aligner cases has revealed that no refinements were required in 3 out of 4 cases<sup>1</sup>. SureSmile® offers doctor- and patient-inspired solutions that deliver predictable results. And, with software user enhancements, SureSmile® Aligners have become even more intuitive and easier to use.**

**Charlotte, NC., June 15, 2023.** Dentsply Sirona revealed its findings from a global analysis of SureSmile® aligner cases conducted between 2019 and 2021, which showed that no refinements were required in three out of four cases,<sup>1</sup> delivering predictable results that both clinicians and their patients can appreciate. More predictable results mean less chair time for patients – allowing for greater productivity for dental practices and increased patient satisfaction.

## **SureSmile offers patient-inspired solutions throughout the treatment journey**

SureSmile understands that every patient's journey is different, which is why it is dedicated to empowering dental professionals with clear aligner tools and solutions needed to provide patients with best-in-class dental care.

- SureSmile® Aligners are custom made using advanced technology and proven materials, providing patients with a customized, comfortable fit from the first aligner to the last.
- SureSmile® VPro™ is a high-frequency vibration device that patients can use at home to help aligners fit properly. When used for just five minutes a day with clear aligners, it may help reduce patient discomfort.<sup>2,3,4</sup> The device is included in the SureSmile® Complete Case offering and is also available to order as a standalone product.
- SureSmile® Retainers protect SureSmile® Aligner patients' investment in their smile once treatment is complete. They have the strength to protect teeth from damage caused by bruxing or grinding without compromising the retainer's clinical effectiveness.\* When retainers are worn as prescribed, they are an effective tool to prevent teeth relapse.

"SureSmile® is so simple and intuitive to use – the whole process is seamless," said Dr. Shivi Gupta, dentist from San Diego, CA, and SureSmile Key Opinion Leader. "Since no or minimal refinements are usually required, I save time and can help even more of my patients achieve the healthy, beautiful smile they are searching for."

## Becoming a SureSmile provider is quick and easy

The SureSmile® Aligners open platform fully integrates with the Primescan® intraoral scanner and other commonly used scanners, allowing clinicians to use existing equipment. After uploading patient records to the SureSmile® Treatment Planning software, clinicians can specify detailed treatment preferences or request a customized plan from the SureSmile® Digital Lab.

The SureSmile® Digital Lab experts provide support throughout the entire workflow. And the [eLearning platform](#) SureSmile U offers numerous step-by-step instructions, videos, and job aids.

SureSmile provides doctors with a comprehensive, digitized clear aligner concept that expands the practice's spectrum of treatment offerings. Patients will be excited to get the smiles they have always wanted – in a way that fits their lifestyle.
