Update-Description

inLab CAM SW 22.5.0

This document describes changes and improvements compared to previous version inLab CAM 22.4.0

**May 2024**

General

New features

New Tool „Define T-Bar"

A new generic tool is available which can be used to add reinforcement structures to reinforce print designs with a high tendency for warpage. The bars can be added, removed and moved manually.

For denture bases and denture try-ins, the t- bars are automatically proposed.
