

## CONFIDENCE COMES FIRST

Minimize cross-contamination and boost patient confidence during conventional impression taking.

As patients return for restorative procedures, there are three key questions you may be asking: How do I keep my patients safe from cross-contamination during impression taking? How do I achieve safety without compromising precision? And how do I keep a close eye on my budget?

At Dentsply Sirona, we're here to help you build patient confidence and practice success.

**Aquasil® Ultra+ Impression Material in the digit® Targeted Delivery System captures and retains critical details even in the most challenging oral environments while offering patient safety and overall value.**

### Safety

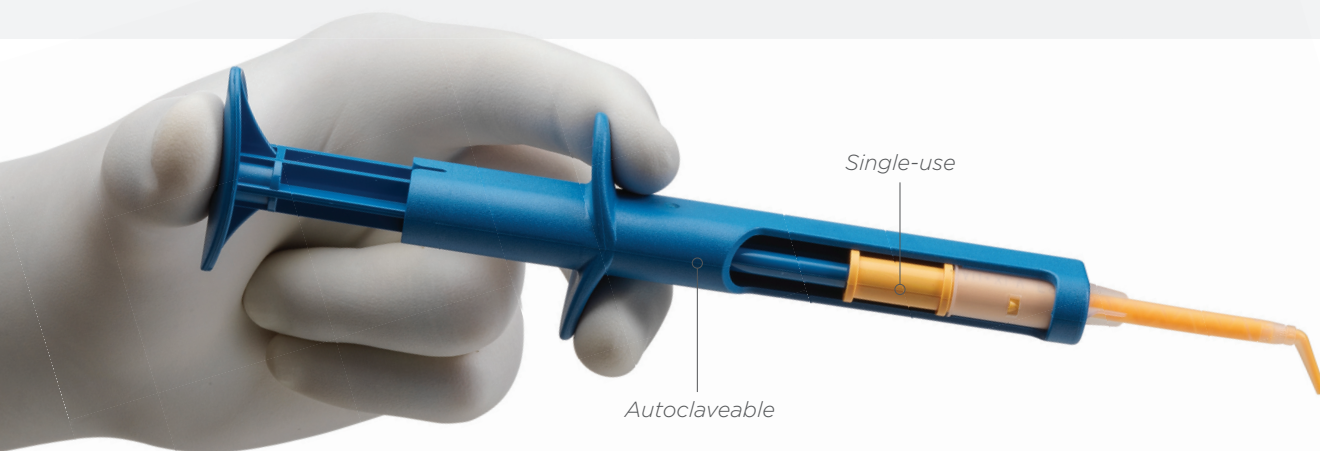

Single-patient use materials and autoclaveable delivery reduce cross-contamination risks for safe environments.

### Precision

Minimize remakes and retakes for effective impressions and less material waste.

### Value

Deliver lower cost per impression than traditional 50mL systems for added savings.

Healthy Practices, Healthy Smiles are in reach with impression material and a precision delivery system, while keeping your patients safe.

To see how Aquasil® Ultra+ Impression Material in the digit® Targeted Delivery System supports your goal of delivering patient peace of mind with the highest level of dental care, visit [www.SingleUnitRestorations.com](http://www.SingleUnitRestorations.com)

# Elevate patient safety and efficient clinical outcomes with single-use and autoclaveable products.

## Aquasil® Ultra+ Smart Wetting® Impression Material

### Single Use

Aquasil® Ultra+ Impression Material in the digit® Targeted Delivery System is a convenient, unit-dose system for precise application of wash material and is used with your preferred Aquasil® Ultra+ tray material in 50mL or DECA cartridges.\*

- Industry-leading intraoral hydrophilicity and intraoral tear strength offer incredible detail and accuracy
- Available in multiple low viscosities including XLV and LV
